PROFESSIONAL SUMMARY

Data Analyst fresher with hands-on experience in SQL, Python, Excel, and Power BI. Skilled in data wrangling, exploratory data analysis (EDA), and dashboard development. Experienced in analyzing datasets of 100K+ records, delivering actionable insights to support data-driven decision-making.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Data Analysis:** Pandas, NumPy, Data Cleaning, EDA
- **Visualization:** Power BI, Tableau
- **Tools:** Excel, Power Query, Data Modeling
- **Databases:** MySQL, MongoDB

WORK EXPERIENCE

Data Analyst Intern – AiVariant Dec 2025 – Mar 2026

- Conducted in-depth analysis on structured datasets to uncover trends, correlations, and insights
- Executed data wrangling, transformation, and exploratory data analysis (EDA)
- Developed interactive dashboards and reports to support business decision-making
- Applied data validation techniques to ensure accuracy and consistency
- Delivered insight-driven recommendations to improve data quality

Machine Learning Intern – Henotic Technology Pvt. Ltd Jul 2023 – Aug 2023

- Built machine learning models using Python and Scikit-learn
- Performed feature engineering, preprocessing, and model optimization
- Increased model accuracy from 72% to 84%
- Evaluated performance using precision, recall, and F1-score

PROJECTS

E-Commerce Olist Store Data Analysis

- Analyzed 100K+ transactional records using SQL to identify trends and customer behavior
- Applied advanced SQL operations including joins, aggregations, and filtering
- Performed data transformation to improve dataset quality
- Built dashboards using Power BI and Tableau to visualize KPIs
- Delivered insights on top-performing products and regions

Zomato Restaurant Data Analysis Dashboard

- Analyzed 9,000+ records using SQL and Python for trend discovery
- Performed preprocessing, normalization, and missing value handling
- Conducted time-based analysis to evaluate pricing and growth trends
- Built dashboards to track restaurant performance and customer preferences
- Generated insights on popular cuisines and high-demand locations

Final Year Project: Diabetic Retinopathy Detection using CNN

- Developed a CNN-based deep learning model for medical image classification
- Performed image preprocessing and data augmentation to improve performance
- Achieved 88% accuracy on validation dataset
- Optimized model using hyperparameter tuning techniques
- Deployed model using FastAPI for real-time predictions

EDUCATION

Bachelor of Technology (Information Technology)
Sagi Rama Krishnam Raju Engineering College
CGPA: 7.82

Diploma (DCME)
Swarnandhra College of Engineering and Technology
Percentage: 76.95%

CERTIFICATIONS

- NASSCOM Data Analyst Certification (Gold – 97%)
- Deloitte Data Analytics Job Simulation (Forage)
- ExcelR Data Analyst Program (Distinction)
- Cisco Certifications: CCNA, Cybersecurity Essentials
